315 Green Street

8-10 am - Workshop
11-2 Counter Day with lunch

Thursday, June 12

Capitol District Supply
ALBANY
850 Broadway

8-10 am - Workshop
11-2 Counter Day with lunch

Flak Jacket™ Arc-Resistant Black CSST

This is a more advanced form of CSST, designed to provide additional safety. The Flak Jacket™ coating is intended to make the tubing resistant to electrical arcs, which can be a potential hazard in environments where lightning strikes or electrical faults may occur. This feature is crucial in preventing gas leaks or fires that could result from punctures in the tubing due to electrical arcing.

Appliance Stub CSST Fitting

Tee CSST Fitting

Pro-Poly™ Underground Gas Piping System

Pro-Poly™ PEIPS/PECTS Series underground medium density polyethylene gas pipe is intended for use in underground and Natural and LP (Propane) Gas piping systems. Series PEIPS/PECTS gas pipe is engineered for direct burial applications.

The Pro-Poly™ Poly Tee Fitting

is used join together 3 MDPE Gas pipes of the same diameter and SDR.

The Pro-Poly™ Poly Coupler Fitting

is used join together 2 MDPE Gas pipes of the same size, this includes the MDPE portion of a rigid riser.
