

GRUNDFOS 

COUNTER DAY

Wednesday, June 25, 2025

11 am - 2 pm

252 Washington Street, SARATOGA SPRINGS

UPSe 15-58 F

Suitable for Commercial and Domestic Heating
UPSe is a high-efficiency circulator designed for heating systems. It offers high energy savings compared to traditional non-ECM pumps and three control modes that make it suitable for any heating application.

ALPHA, North America

Suitable for: HVAC: Heating; Plumbing: Hot Water Recirculation; District Heating; Residential hot water recirculation; Industrial Heating.
ALPHA are high-efficiency variable speed circulators designed for circulating liquids in heating and domestic hot-water recirculation systems. The pumps are simple, fast, and easy to install and operate.

**New Generation of Pumps,
Get Ready for the Next Level!**
